

1204

1205

Features

- An injected housing that provides the equipment with great stability, painted in epoxy.
- Plate measures:
 - Circular: 150-mm \varnothing stirring surface made of AISI 304 stainless steel or ceramic. (Version 1204 and 1205). Ceramic surface also available.
- Shielded heating element system with an indicator light to signal heating
- Temperature control is a digital thermostat with PID self-adjustable control
- " J " type probe
- Temperature control from ambient up to 350°
- The stirring capacity exceeds 10l (relative to water).
- Stirring speed variable between 30 and 2100 r.p.m.
- Includes Teflon-insulated magnet. (8x40mm)
- Manufactured according to CE standards.

Specification

| Model | 1204 | 1205 |
|---------------------|-----------------|-----------------|
| Heating surface | Ceramic | Stainless steel |
| Working temperature | 350°C | 350°C |
| Watt | 500 | 500 |
| Weight | 3kg | 3kg |
| Power | 220VAC, 50/60hz | |
