

Selecting an autoclave is an important long-term investment decision. Choosing the right sterilization system will have a positive impact on performance and efficiency. The Touch lave-Lab range is provided with a host of features specifically designed to improve throughput and usability.

'K' models are LTE's top-line range and are designed to operate using either an integral steam generator situated beneath the chamber or the customer's own direct steam supply. To facilitate easy maneuverability and site positioning, all models are fitted with castors and will fit through a standard door.

Features

- Vertical sliding door
- Vertical sliding door
- Water jacketed chamber
- Touch screen control system
- Internal data archiving
- Built-in exhaust condensate unit
- Water conservation system
- Built-in silent air compressor

Specification

MODEL	K150	K200	K315
Capacity	150	200	300
Steam source	Integral Generator		
Chamber Dims. HxWxL	600x500x500	600x500x660	600x500x1000
Weight	400	440	650
Shelves/ positions	2/4		
Power	15kw. 3-Phase, 400-440V, 50Hz. 25A/phase N+E Supply
