

Microscopes of MBL2000 series were developed for versatile applications in research, medicine and industry. Hence they are available with a wide range of accessories. High manufacturing quality, shown for example in the stable metal stand, and premium optical components assure a long economic life-time.

Features

- XY cross table
- Double lens Abbe condenser NA 1.25
- Filter holder
- Blue- and green filter
- Dioptrre compensation
- Metal stand
- Both side coaxial coarse and fine adjustment, 30 mm
- Fast focus feature
- Mobility adjustment
- Low voltage lighting
- Power supply: 230 V (115 V optional)

Specification

Model	MBL2000	MBL2000-PL	MBL2000-T	MBL2000-S
Optical equipment	10x Plano eyepieces achromatic objectives 4X NA 0.10 10X NA 0.25 40X NA 0.65 100X NA 1.25 oil			
Lighting	Adjustable bright field- lighting 6 V 20 W, double-lens Abbe- condenser NA 1.25 with iris diaphragm			
Special equipment	-----	-----	Photo tube	-----
Application	Research, diagnosis, quality control			Research, School
Power	220VAC, 50/60hz
