

Features

- Easy and jolt-free raising and lowering of evaporator
- Rodaviss screw joint allows bonded ground joints to be release easily
- Removable screw connection facilitates cleaning of glass components
- Telescopic stand tiltable to the side
- Control knob for manual adjustment of speed from 46 to 260 rpm
- Condenser geometry with 1,200 cm² cooling surface for higher yield and cooler condensate—contributes to environmental protection
- No chimney effect and no foaming
- Includes heating bath; set of glassware with either diagonal or vertical condenser; drive; telescopic stand; and boss head clamp

Specification

Model	RV-05
Type of cooling	diagonal
Cooling surface	1200 cm ²
Motor principle	asynchronous
Speed range	46 - 260 1/min
Lift	manual
Stroke	190 mm
Heating temperature range	room temp. - 225 °C
Heat output	1000 W
Voltage	110-220VAC
Frequency	50/60 Hz
